SCOPE

The Workshop on Automated Specification and Verification of Web Systems (WWV) is a yearly workshop that aims at providing an interdisciplinary forum to facilitate the cross-fertilization and the advancement of hybrid methods that exploit concepts and tools drawn from Rule-based programming, Software engineering, Formal methods, and Web-oriented research.

Nowadays, many companies and institutions have diverted their Web sites into interactive, completely-automated, Web-based applications for, e.g., e-business, e-learning, e-government and e-health. The increased complexity and the explosive growth of Web systems have made their design and implementation a challenging task. Systematic, formal approaches to their specification and verification can permit to address the problems of this specific domain by means of automated and effective techniques and tools.

Topics of either theoretical or applied interest include, but are not limited to:
- Rule-based approaches to Web system analysis, certification, specification, verification, and optimization.
- Languages and models for programming and designing Web systems.
- Formal methods for describing and reasoning about Web systems.
- Model-checking, synthesis and debugging of Web systems.
- Analysis and verification of linked data.
- Abstract interpretation and program transformation applied to the semantic Web.
- Intelligent tutoring and advisory systems for Web specifications authoring.
- Middleware and frameworks for composition and orchestration of Web services.
- Web quality and Web metrics.
- Web usability and accessibility.
- Testing and evaluation of Web systems and applications.

INVITED SPEAKER

Elie Najm Telecom ParisTech, France
SUBMISSION

Submitted papers should present original unpublished work and cannot be under review for publication elsewhere. Each paper will undergo a thorough evaluation by at least three reviewers, chosen by the Program Committee. Contributions should be in PDF format and prepared in LaTeX using the EPTCS-style format (http://style.eptcs.org/) and should not exceed 15 pages (typeset 11 points).

Submissions are handled using the EasyChair online system and can be uploaded using the following link: https://www.easychair.org/conferences/?conf=wwv2011

Submission is a firm commitment that at least one of the authors will attend the workshop, if the paper is accepted.

PUBLICATION

Accepted papers will be included in the pre-proceedings, which will be made available in electronic form through the WWV web site. After the workshop, authors of accepted papers will be asked to prepare, by incorporating insights gathered during the event, a final version of their paper to be published in the post-proceedings.

An open call for a special high-quality journal issue on the topic of the WWV workshop is envisaged.

WORKSHOP CO-CHAIRS

Laura Kovacs Vienna University of Technology, Austria
Rosario Pugliese University of Florence, Italy
Francesco Tiezzi University of Florence, Italy

PROGRAM COMMITTEE

Maria Alpuente Technical University of Valencia, Spain
Demis Ballis University of Udine, Italy
Maurice ter Beek ISTI-CNR, Pisa, Italy
Santiago Escobar Technical University of Valencia, Spain
Jean-Marie Jacquet University of Namur, Belgium
Laura Kovacs Vienna University of Technology, Austria
Temur Kutsia Johannes Kepler University Linz, Austria
Tiziana Margaria Univ. Potsdam, Germany
Manuel Mazzara University of Newcastle, United Kingdom
Catherine Meadows NRL, United States
Yasuhiro Minamide University of Tsukuba, Japan
Rosario Pugliese University of Florence, Italy
I.V. Ramakrishnan SUNY Stony Brook, United States
Francesco Tiezzi University of Florence, Italy
Franz Weitl National Institute of Informatics, Tokyo, Japan
Nobuko Yoshida Imperial College London, United Kingdom
